IT set free with Chrome Enterprise Upgrade

What is Chrome Enterprise Upgrade?

Chrome Enterprise Upgrade unlocks the built-in business capabilities of Chrome OS and Chrome devices for IT to secure, orchestrate and power the cloud workforce.

Advanced Security

Chrome Enterprise Upgrade provides IT with advanced security controls. If an end user misplaces their Chromebook, IT can easily disable the device, protecting corporate data. Devices can also be set as ephemeral, removing user data from the device at the end of a session.

Flexible Access

Chromebooks with Chrome Enterprise Upgrade provide flexible access to corporate data, regardless of use case. Integrate with Active Directory and SAML SSO providers or enable shared device use cases with managed guest sessions or kiosk mode.

Simplified Orchestration

Chrome Enterprise Upgrade helps IT simplify orchestration of the organization's Chrome device fleet. IT gains access to device policies and fleet oversight capabilities, all from the easy-to-use, cloud-based Google Admin console or third party UEM solution.

24/7 IT admin support

Contact Google for Chrome OS troubleshooting assistance with 24/7 IT admin support.

"

We can centrally manage Chromebooks in all of our customer offices using Chrome Enterprise Upgrade. Everyone can be on the same version of our application at the same time—there's just a single button to deploy versions to test environments as well as production."

David Murray,
Chief Technology Officer, Doctor.com
