

# DaVinci Collaborative: Google Cloud Transformation

LogicWing transitioned Davinci Collaborative from using a manual, paper-centric workflow, to modern, streamlined, digital process management and collaboration utilizing Google Workspace for Business and Chromebooks.

## The challenge

DaVinci Collaborative needed to streamline their workflow, improve collaboration and communication, with an overall increase in security, to scale their workforce to serve a growing base of clients. With their mission of improving the learning outcomes of the children they supported, the staff needed to use technologies that had built-in accessibility features.

## The solution

LogicWing assessed the needs of leadership and staff of DaVinci Collaborative. Google Workspace for Business was deployed and data migrated from various legacy systems. Each staff member was given a Chromebook for onsite and remote work. Chrome devices were used to power digital signage in the office. LogicWing worked closely with key staff members to document and then redesign workflows.

## The results

With LogicWing's help, DaVinci Collaborative has been able to grow their workforce, and their client base, using Chrome devices and Google Workspace for Business. Their staff has easy, secure access to the data and apps that they need to support learners. They can communicate and collaborate from anywhere, at any time using Chrome.

“ The challenge for us at Davinci was to find a way to improve efficiency and communication without compromising security of information. Working with LogicWing to incorporate Google Workspace has provided us with the ability to collaborate instantly and save time and effort through streamlined organization and accessibility. All aspects of our business function have benefited from the shift. ”

Kerry Leo, M.S. Ed, CEO and Founder

## About DaVinci Collaborative

The professionals at DaVinci Collaborative are dedicated to bringing diagnostic and prescriptive strategies to students, parents, and school districts to help them support learning needs and maximize their unique academic potential.
